

CONLEY'S HOBBY HOUSE

conleys.com

Conley's Hobby House Quality

Coverings consist of clear, Twin wall UV resistant sheets complete with energy efficient insulation qualities and a 10-year warranty against discoloration

Experience

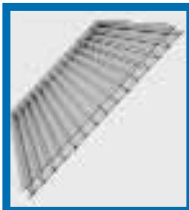

ROLL-FORM legs, trusses and purlins offer superior structural strength and represent the same components utilized in Conley's commercial greenhouse structures.

Value

Components supplied pre-cut and punched for easy bolt-together assembly. Step by step installation included.

Reliability

Conley's Hobby House is constructed with an all-galvanized steel frame design which insures maximum strength and life. All buildings are engineered to meet 70 mph wind ("B") and 10 lb live load per the I.B.C. Building codes.

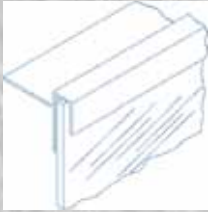

6mm twinwall polycarbonate glazing provides excellent light transmission and insulation.

Conley's Unique Hobby House packages incorporate the same quality design standards and industry proven components utilized in its full line of commercial greenhouse structures. Quality and reliability are the two standards you can always count on with Conley's. ROLL-FORM legs, trusses and purlins offer superior structural strength and represent the same components utilized in Conley's commercial greenhouse structures.

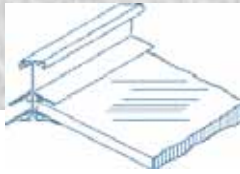

SPECIFICATIONS

HOBBY HOUSE

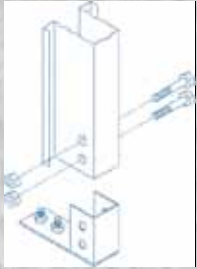

Aluminum end bar "seals" the house against rain and snow.

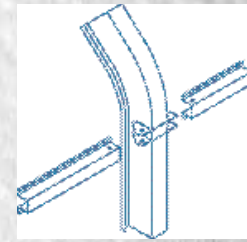

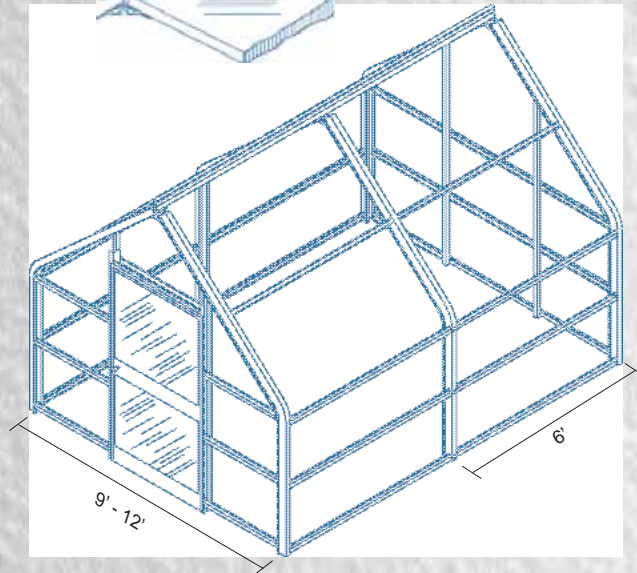

Aluminum ridge bar creates a "flashing" for roof coverings.

Simplified arch to leg connection enhances Conley's superior strength "Rollformed" design.

Heavy duty legs bolt directly to base plate.

Anti-drip purlin assemblies control condensate.
