Legend

Please locate your printer model. The corresponding icon will indicate which product can be used in your printer.

-  Prints up to 4" or 5" on a 5" web (material width). TEC472M • TEC572M • TECSX4M • TECSX5M
-  Prints up to 4" or 5" on a 9" web (material width). TXP3-4 • TXP3-5 • TXPSX5 • TXPSX4
-  Fits most SATO and Zebra printers. Print width may vary.

TXPSX Thermal Printer

The TXPSX models contain the features that make them the best-seller in the horticultural market. The rugged powder-coated industrial strength steel case is designed for harsh environments, yet still attractive for office or store settings. These printers easily handle material thickness up to 24 mil at speeds up to 10" per second. They are available with 4" (203 dpi) or 5" (300 dpi) print heads with 10" tag width allowance. The TXPSX models come standard with Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). USB and Ethernet connectivity are available as options.

		approximate weights printer / cable box
4" TXPSX4	\$3,195.00	60 lb. / 3 lb.
5" TXPSX5	\$3,895.00	60 lb. / 3 lb.
TEC9005-R	\$250.00	
(USB Port Option)		
TEC9004-R	\$395.00	
(Ethernet Port Option)		

TECSX Thermal Printer

The TECSX models contain the same features as the TXPSX models however they handle up to 5" tag width. This unit is ideal for tags, labels and signs up to 5" wide. Utilizing the End-To-End Slip-on tags, various pot tags, pressure sensitive and signs makes this the most versatile printer for the money on the market. The TECSX models come standard with Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). USB and Ethernet connectivity are available as options.

	4" TECSX4M	5" TECSX5M	USB Port Option (TEC9005-R)	Ethernet Port Option (TEC9004-R)

GL Thermal Printer

The new GL4e series is SATO's most significant release of printing technology to date. Versatility and value are the cornerstones of the new GL4e series; only the GL4e series offers a field-upgradeable UHF RFID option; an industry-leading printer management utility; SATOnet CONNECT™ standard tri-port communication protocols of RS232C serial, IEEE1284 high-speed parallel and USB 2.0 plus LAN and 802.11g Wireless LAN as options; an "automatic detection system" to conveniently switch between 203 dpi (GL408e) and 305 dpi (GL412e) print resolution; an Online Barcode Verifier (OBV) option that validates barcode scanability at point of print; competitive emulations and much more.

To Complete

Taggit Pro™ Labeling Design Software and Database

Whether you need to print bar codes, text, graphic images, color pictures or from a database, Taggit Pro™ has the features to help you design and print tags and labels with ease.

- Microsoft Vista ready
- Batch printing
- Full-featured database construction capabilities
- Utilize TrueType fonts, bar codes, preset formats for all our labels and graphics capabilities
- Free phone support
- Includes plant database designed by our company with over 4500 records. This includes Annuals, Perennials, Trees and Broadleaf Shrubs, and is totally editable to add additional varieties or information.

LabelView Gold

This is another wonderful product from the designers of Taggit Pro. This software package is for the ultimate in label design and integration. Label View Gold has the same features as Taggit Pro plus:

- OLE Automation
- Command Files
- Comm Watch
- Data Watch
- Visual Builder
- Label Select.

	Taggit Pro	LabelView Gold
Price	\$359.00	\$995.00

LabelView Network Version

If it is necessary to print multiple stations or locations you will need to install Label View Network Version. Please call us today to discuss your needs and we can quote the appropriate software solution.

For Hardware and Software questions, please contact Technical Support at 800-858-7425

**Thermal Slip-On®
End to End Tags**
Low Density Polyethylene (TX) 10 mil
(Vertical Feed)

Features:
The following tags can be pre-printed flexographically during the manufacturing process or with the thermal transfer printing method.

Flexographic Set – Up Charges:

Plate Charge	\$30.00/ea.
Additional Plates	\$20.00/ea.

Did You Know?

When selecting a thermal pot tag take into account the environmental conditions and the length of time the tag will be subjected to the environment. Styrene (SX & ZX) is best used when the requirement is less than 6 months. Styrene is impacted by UV exposure and cold temperatures more than polypropylene which can last up to 1 year or longer in certain conditions.

Thermal Sta-Loc® Hang Tags

Thermal Material (TX) 10 mil
Heavy Plastic Material (PX) 24 mil

Features:

Thermal print adheres to the surface for years and will not fade. Dry printing process; tags are ready to use as they come off the printer.

Print Charges:

Print one side less than 1"	\$7.75/M
1" and greater	\$10.00/M

Minimum Order: 500 per variety \$1.00 set up fee per variety for varieties less than 1,000.

Hot Stamp Set Up Charges:

Straight Line Copy Engraving	\$7.00/ea.
Logo/Artwork Engraving	\$35.00/ea.

Thermal Signs

Rigid Material (NC) 10 mil

Features:

Sign stock is ready for immediate insertion into the sign holders found on page 18.

Floratherm (FT) 3.2 mil

Features:

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The labels can be applied to smooth damp containers, flats and trays with excellent results. Signs may be preprinted with decorative borders and your company name or logo. They can also be flood-coated to create additional color options.

Flexographic Set-Up Charges:

Plate Charge	\$30.00/ea.
Additional Plate Charge	\$20.00/ea.
Artwork Charge	\$60.00/hour

Please call for quotation of printing charges and minimum quantities.

Clear and Block-out Adhesive Labels:
All of the below label sizes are also available in a Clear Synthetic (Plastic) or with Block-out Adhesive. Clear labels are commonly used to place variable data on custom printed picture tags in an attractive manner. Block-out adhesive labels are designed to cover up whatever is behind the label. If you need to re-price or change a bar code, the Block-out Adhesive label will not allow the original information to show through. If you are interested in either application, please contact your Authorized Master Reseller for a quote.

Did You Know?

There are many types of adhesives available for the creation of pressure sensitive labels. Sato Labeling Solutions has selected an adhesive for the “Floratherm” product line that will adhere and function in most horticultural environments and situations. This adhesive is designed to function when the following conditions are present: cold and hot temperatures, sunlight, wind and moisture. Sato does recommend testing its “Floratherm” product on your particular container or tray to make sure the adhesive is compatible with the type of plastic used to produce the container. This test will require applying several labels to the container in several different orientations and checking back in 24 hours. The bonding process should be complete within 24 hours. If any concerns arise after checking the test, please contact customer service or your Sato sales representative to discuss.

Features:

These signholders and markers are great for identifying plants and advertising specials. They utilize top-locking bars to hold signs in place. Can be a great way to display signs on page 17.

T-Stakes

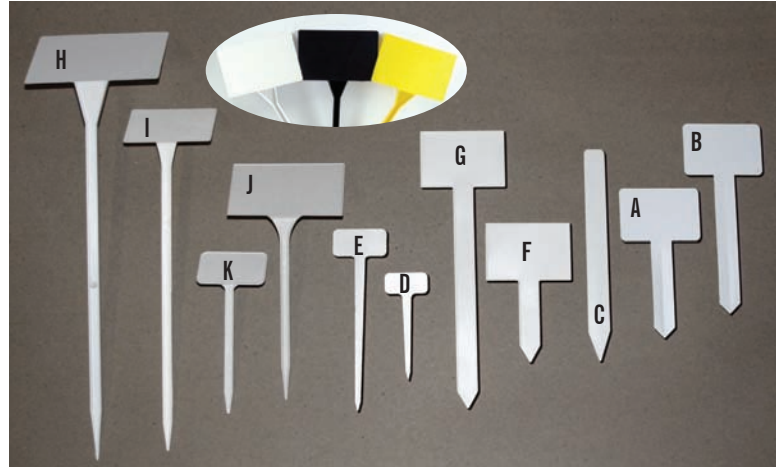

Features:

T-Stakes are produced from 30 mil white polystyrene for easy insertion into most soil. They may be purchased blank or pre-printed in one or two colors. Our UV stabilized pen found on page 20 can be used also to write on these stakes. Minimum order for printed stakes: 1,000 per variety. Call for quote.

Rigid vinyl (RC) sold tag available in white with red print or red with black print. For customized printing contact customer service for a quotation. Sold in pkg. qty. of 100.

RC2753RE • RC2753WH

ElastiTag™ SOLD Tags

SATO Labeling Solutions and Bedford Industries have partnered to produce a revolutionary hang tag. Utilizing the patent pending ElastiTag™ attaching device, this Sold Tag is the first of its kind. The highly weatherable rubber attaching device is extremely easy to use and can wrap around a wide range of products. Since the ElastiTag™ attaching device is extremely stretchable, you can feed the tag through the slit for small caliper items and a tight fit. Or you can simply use the opening to slide the tag on to large caliper items. Available in Red or White. Sold in pkg. qty. of 100.

Ringer and Rings

The ringer has revolutionized the auto-ringer market with its "pneumatic-like" action and ease of use. From balling and burlapping, to tagging of pots, this tool puts affordability with quality. The "D" shaped ring creates a triangle "△" when attached.

B7 Auto Ringer and Rings

The application of the self-feeding principle to the familiar hog ring plier meets a need that all users of this fastening method have been waiting for. The auto ringer cuts operating time and costs, and increases savings and profits. A very useful tool on every job within the range of this staple size. The SR8 rings for the B7 are galvanized. The "C" shaped ring creates a circle "○" when attached.

Custom Marketing & Printing Solutions

Marketing Solutions Designed To Drive Sales

The Horticulture Division of SATO Labeling Solutions America, Inc. is committed to finding solutions, to solving challenges and helping our customers increase their sales through custom marketing programs. The most effective programs are tailored for your specific product or program combining; containers, custom designed tags, and point-of-purchase (POP) materials to achieve merchandising strategies aimed at generating turns. We work with our graphic design partners for fresh ideas and consumer trend expertise. We're committed to developing the most effective solution for you and differentiation is a key to distinguishing your program from the masses.

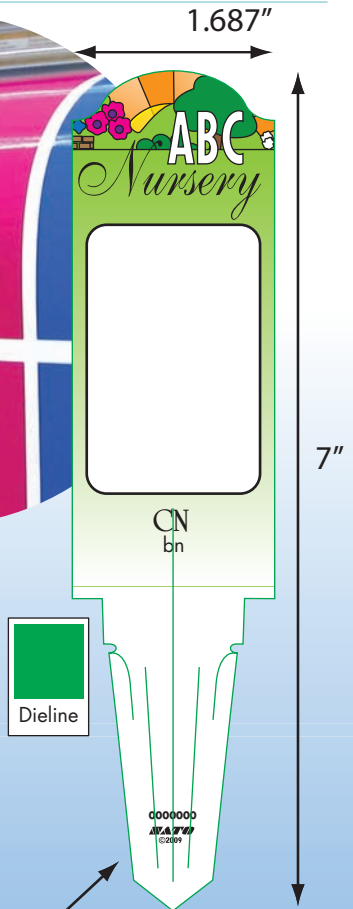

Custom Marketing
Apply your companies logo or a unique look for your tag.

Plant Photography
From our library of ten's of thousands of images.

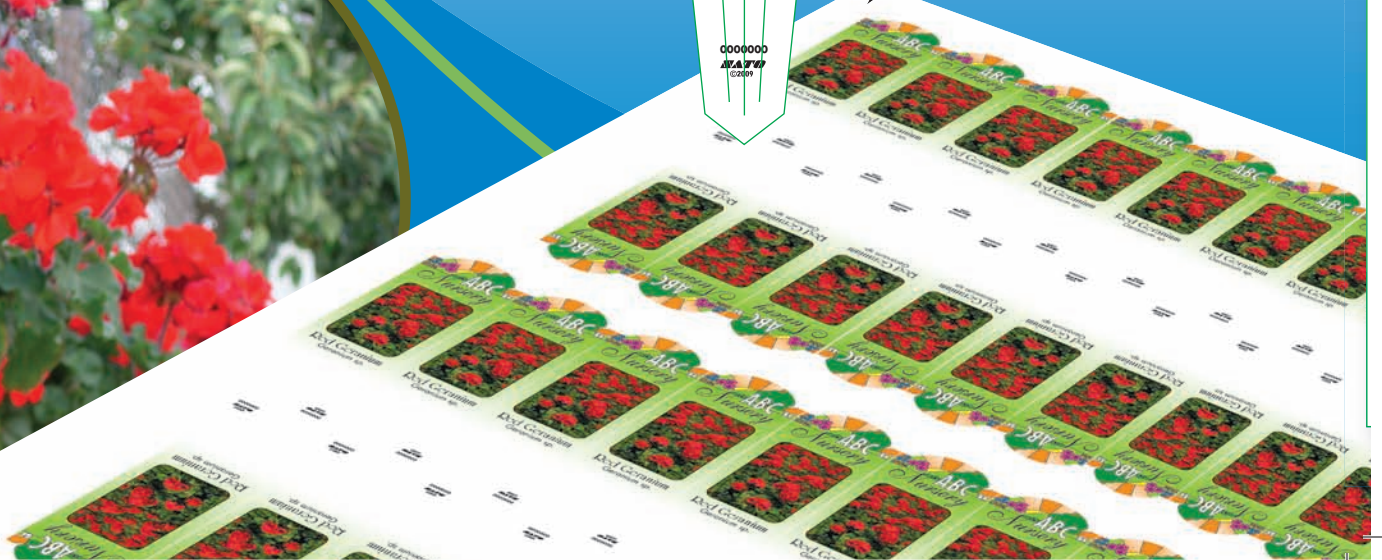

Variable Data
From our database of thousands of plants.

Online PDF for Proofing
Files available for download online for easy proofing. Proofing made easy with PDFs using Adobe Acrobat reader.

Concepts
In this day and age it's all about ROI- Return on Investment. Let us work to build your visibility in custom design. We are available to offer strategic marketing, photography services and creative designs.

Printing Solutions
At Sato we specialize in quality printing and producing your order in the most efficient way. Quality printing means attractive tags that increases retail profits.

Create Product Visibility with Custom or Standard Die Shapes

Pot Stakes

Choose from our library of standard shapes, or we can create one that fits your products unique marketing requirements needs.

All dies shown at 75% of original size.

Hangtags

Choose from our library of standard shapes, or we can create one that fits your products unique marketing requirements needs.

All dies shown at 75% of original size.

Info Sticks

	IF11 (11")	IF15 (15")
price per thousand	\$46.50	\$75.50

box weights	39 lb.	46 lb.

Retail Center Marketing Programs and Custom Marketing Features

walmart

D75M Hang Tag
2.812" x 6.303"

D370 Pot Tag
1.687" x 7"

D368M Christmas Tree Tag
5.967" x 6.303"

Suntory

D58 Pot Tag
2.125" x 5.75"

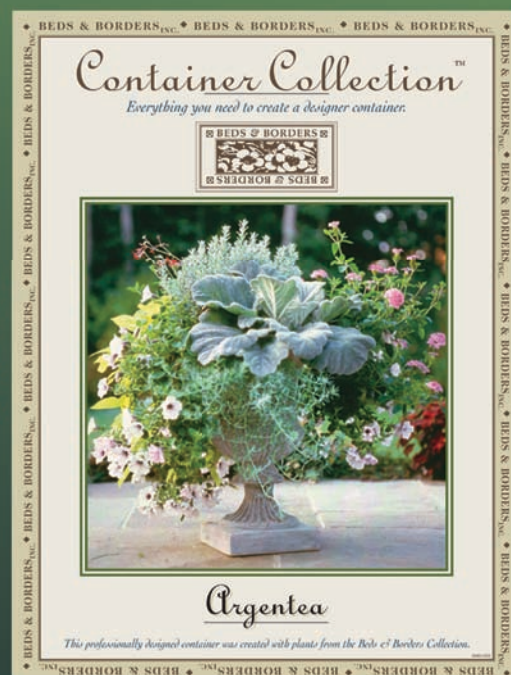

Point of Purchase (POP) Signs

Point of Purchase Signs are an important marketing tool. These are placed in "high traffic" areas, and are an excellent item to direct consumers to products and answer common questions about those products. Using POP signage along with Posters, Hangtags, Signs, Pot Stakes, Handles, and Labels creates a "Common Theme" for your product.

Point of Purchase Signs are produced in a variety of color/colors, sizes, and are designed to compliment and promote your product.

Typical sizes are, but not limited to:
5" x 7", 7" x 11", 11" x 7"

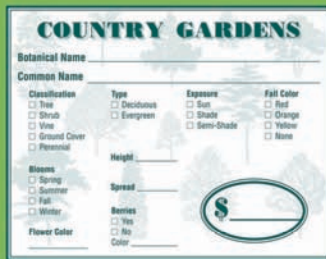

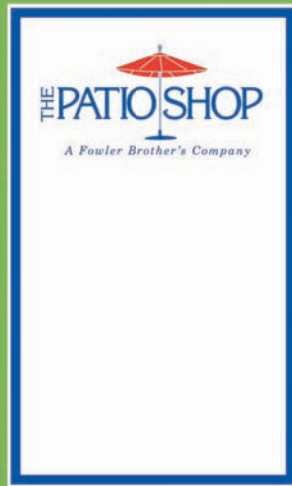

Custom Cards

Custom Cards are produced on plastic that will hold-up to environmental conditions, such as rain, sun, hot and cold. Custom Cards are simply that "Custom". These can be used to announce a sale, promotion or simply list a specific products care.

These can be coordinated with Posters, Hangtags, Signs, Pot Stakes, POP, Handles, and Labels.

Typical sizes are, but not limited to:
3" x 4", 4" x 5", 5" x 7"

Banners

Banners are an excellent choice for special product recognition on a larger scale. Banners are very visible, and are a great way to attract the consumer to the area where your product is located. Used with eye-catching graphics and coordinated with Posters, POP, Hangtags, Signs, Cards, Pot Stakes, Handles, and Labels, Banners make a strong marketing presence.

Call for quote.

Posters and Wall Charts

Great for large area advertising, special product promotions, instructions, or as a reference point announcing special features of your product or other marketing pieces.

These can be coordinated with Hangtags, POP, Signs, Cards, Pot Stakes, Handles, and Labels. Can be produced in a variety of color/colors, sizes, and are designed to compliment and promote your product.

Printing Material

Bio-Friendly Printing Material Options...

The Horticulture Division of SATO Labeling Solutions America, Inc. is committed to finding solutions, solving challenges and helping our customers increase their sales through custom marketing programs. The most effective programs are tailored for your specific product; combining containers, custom designed tags, and point-of-purchase (POP) materials to achieve merchandising strategies aimed at generating turns. We work with our graphic design team to provide fresh ideas and consumer trends. We're committed to developing the most effective solution for you, and differentiation is a key to distinguishing your program from the masses. Let SATO help you with your next environmentally smart horticultural printing project.

Non-Biodegradable Plastic in the Marketplace...

Many of the plastics used today in the Horticultural marketplace are made up of non-recycled and recycled plastics. However, many of these plastics are being discarded and not being recycled. A large portion of these plastics will not break down over a long period of time, which doesn't help reduce the waste footprint in our environment. As a result, we are committed to providing our customers with material options, including ones that promote environmental stability. This Bio-friendly plastic material provides a perfect palette for offset printing that is comparable to traditional plastics. This material is durable and an excellent choice for your Horticultural applications. All together, recycling is a great start for our market place, but a large portion of materials will still enter the landfill. The best alternative is to have a bio-friendly plastic that's not only durable, but will breakdown naturally.

Biodegradable Plastic Q and A...

What causes the material to breakdown? Is this a biological or chemical reaction that takes place?

You might consider it a bio-chemical reaction, as bacteria utilize enzymes effective for the breaking of long polymer chains in the plastic product. Since the bio-plastic is hospitable as an environment, bacteria will collect in colonies there, and breakdown will initialize.

How long does it take for the plastic tag to completely disappear?

If discarded in a bio-rich environment (in contact with the material, such as in a landfill), breakdown on average is 1-5 years. Material on warehouse shelves, or in the retail environment, are not considered as candidates for this breakdown process.

"Tags end up all over my nursery grounds. I know there are tags in the soil that are many years old. If I switch to a biodegradable material can anything harmful end up in the soil that could affect the plants in the ground? This is for growers who place trees and large shrubs directly in the ground."
Unlike oxo-degradable technology, this does not use any heavy metals. The end products are to be carbon dioxide, water, and any earths/filler used to color the product (which came from the earth in the first place - clay, calcium carbonate, TiO2, talc, etc).

"I place pot tags in the container when the cuttings are rooted. The plant grows for 4-6 months in my greenhouse. Will the tag breakdown while in the soil during the growing process? Will any chemicals or biological items leach into the container that could affect the plant?"

The portion of the plastic buried in the soil will be given the greatest potential contact with bio/bacteria. Thus, very small amounts of biodegradation are possible, but the structure of the tag should not be compromised. (especially in the shorter 4-6 month frame).

"I sometimes inventory tags for up to 3 years. Do I need to take any special precautions with the tags during that time frame?"

Sensible care should be adequate for the tags, i.e. relatively dry warehouse shelves are fine. Wrapping or bagging is certainly a good precaution. If conditions are like a greenhouse environment, where mold and mildew are prevalent, then you'll want to watch your material more carefully. However, unlike oxo-degradables, these items aren't going to start breaking down merely on a time-based model.
